BLACK KITE

SOAR TO NEW HEIGHTS IN THIRD-PARTY RISK MANAGEMENT

WITH CYBER RISK INTELLIGENCE BEYOND A RATING

At Black Kite, we're redefining and disrupting vendor risk management with the world's first global third-party cyber risk monitoring platform built from a hacker's perspective. Adversaries attack companies through third parties, island-hopping their way into target organizations. We aim to help you be as agile as the adversary.

With 300+ customers around the world and counting, we're committed to improving the health and safety of the entire planet's cyber ecosystem with the industry's most accurate and comprehensive cyber intelligence.

DISCOVER UNDETECTED RISK WITH THE POWER OF VISIBILITY

While other security ratings services narrow the scope, our non-intrusive, powerful scans tap our data lake, accessing information on 34 million companies – 4x that of our competitors. We tell the full story, providing a multidimensional view of your entire attack surface from a technical, financial impact and compliance perspective.

SEE INTO THE WILD WITH PREDICTIVE INTELLIGENCE

As new threats emerge, our platform is built to adapt. When the Log4j vulnerability interrupted the status quo, we remained dynamic by adding new detection functionalities to the platform. Similarly, ransomware is one of the most threatening attack methods impacting the world today, and **Black Kite is the only cyber risk rating platform with a ransomware indication tool.** Using data and machine learning, Black Kite's RSI™ discovers the likelihood that an organization will experience a ransomware attack, before the attack itself.

RANSOMWARE SUSCEPTIBILITY INDEX™

0.0	0.514	0.6	1.0
	EXAMPLE RSI	CRITICAL THRESHOLD	

Bring **confidence into the unknown,** and avoid business interruption and data loss by using our reliable data to develop informed policies around all emerging threats.

OPERATIONALIZE YOUR PROGRAM AT A FRACTION OF THE TIME AND COST

Our automated platform is built to scale alongside your digital supply chain– without sacrificing time or efficiency. We optimize risk information for you so your team spends less time interpreting data and more time taking steps to improve cyber posture. Built on the latest Cloud technology, **we reduce assessment times from weeks to hours.** In turn, you can cost-effectively embrace full supply chain monitoring – as all third-party vendors pose a risk to your organization, not just the ones that appear most vulnerable.
